LIGHTING

Patina Signature HEX Range.

The Patina Signature range is the first technical de-glaring suspended chandelier utilising OGP de-glaring prismatic technically compliant structure with LST sensor technology. The Signature 400 and 600 utilises Patina's IP protected PCB 400 and 600 linear SELV PCBs.

Features ...

- Slim, modern design
- Patina *intellect* occupancy/daylight dimming sensor, combined with Patina Signature Hex luminaires deliver the most energy efficient system available. * with stand alone Intellect sensor.
- No additional lighting control system required, programmed to clients preferred settings via remote control* with stand alone Intellect sensor.
- Using the most up to date and efficient LED technologies, the luminaire offers outstanding light output which matches and in some cases exceeds the market equivalent generic T8 and T5 luminaires.
- Maintenance of the fitting allows for the LED electronics to be accessed and updated as required in future years providing a long term shallow depreciation solution.
- Innovative and engineered refractor, combined with the positioning of the LED's disperses the light evenly in an optically efficient manor.
- High quality brushed steel finish offers smart aesthetics

Patina Signature HEX Range.
